12,396	1,67,737	3,54,777(c)	70,155(d)	7,01,550	35,67,750	7,70,550	42,78,300	3,82,825(e)	1,81,418(f)	5,36,196											

(c) The total of column 40 exceeds by 13 the actual half of the total ordinary recurring cost of all the municipalities. This is due to avoiding fractions in halving the recurring cost of individual municipalities.

(d) That is more than double the present numbers in primary schools, and nearly double the total now in primary schools and maktabs together.

(e) Eight and-a-half per cent. on the total of column 45 will be 3,63,656 which differs very slightly from the total of column 46 owing to the nearest rounding.

(f) Been taken for individual municipalities.

(b) The average education cess proposed varies from As. 12 to As. 2 per annum. It is, therefore, perhaps natural to think that the rate-payers paying As. 12 or less per annum as municipal tax should be exempted. A comparison of the figures shown in column 8 with the number of rate-payers proposed for exemption in the various schemes shows that in a large number of cases the former greatly exceeds the latter. This leads the special officer to doubt the practicability of insisting on half and half basis in the case of all the municipalities and to advise their careful classification according to their resources.

APPENDIX

Existing conditions of

Serial No.	NAME OF MUNICIPALITY.	Area in square miles.	POPULATION.			Number of rate-payers, as returned 1922.	As. 12 or less. (k)	NUMBER OF RATE-PAYERS WHOSE ANNUAL							
			Male.	Female.	Total.			More than As. 12 but not more than Rs. 1-2.	More than As. 12 but not more than Rs. 1-2.	More than Rs. 1-2 but not more than Rs. 1-8.	More than Rs. 1-8 but not more than Rs. 1-14.	More than Rs. 1-14 but not more than Rs. 2-4.	More than Rs. 2-4 but not more than Rs. 3.	More than Rs. 3 but not more than Rs. 4-8.

(k) The average education cess proposed varies from As. 12 to Rs. 2 per annum. It is, therefore, perhaps natural to think that the rate-payers paying As. 12 or less per annum as municipal tax should be exempted. A comparison of the figures shown in column 8 with the number of rate-payers proposed for exemption in the various schemes shows that in a large number of cases the former greatly exceeds the latter. This leads the special officer to doubt the practicability of insisting on half and half basis in the case of all the municipalities and to advise their careful classification according to their resources.

APPENDIX

(a) The average education cess proposed varies from as. 12 to Rs. 2 per annum. It is, therefore, perhaps natural to think that the rate-payers paying as. 12 or less per annum as municipal tax should be exempted. A comparison of the figures shown in column 8 with the number of rate-payers proposed for exemption in the various schemes shows that in a large number of cases the former greatly exceeds the latter. This leads the Special Officer to doubt the practicability of insisting on half and half basis in the case of all the municipalities and to advise their careful classification according to their resources.

DEPARTMENT OF AGRICULTURE, BENGAL.

Final Forecast of the *Bhadoi* Crops of Bengal, 1922-23.

[NOTE.—On an average of the five years ending 1920-21, the area under autumn rice in Bengal has represented some 6·4 per cent. of the total area under rice in British India.]

Character of the season.—As indicated in the preliminary forecast, the weather at the outset was unfavourable owing to unusually prolonged drought which continued up till May. Consequently sowings which commenced slowly in the early part of April finished as late as June. Good rainfall during this month, however, favoured the growth of the crops. The rainfall in the months of July and August was unevenly distributed, with the result that floods caused considerable damage to the low-land crops, especially to ripe paddy in parts of North and East Bengal. Highland crops, on the other hand, fared well. On the whole, a fair crop has been reaped for the province.

Acreage.—The total area sown with the different *bhadoi* crops this year is reported to be 5,938,100 acres as against 6,477,000 acres last year. Of this, the area under autumn rice is estimated at 5,160,200 acres as against 5,607,300 acres last year.

Outturn.—According to the District Officers' estimates, the outturn of autumn rice as well as of all the *bhadoi* crops together work out at 78 per cent. of the normal for the Presidency as against 85 per cent. last year.

Accepting 78 per cent. as the outturn of autumn rice this year, the gross outturn of the crop for the Presidency on the basis of a normal yield of 10½ maunds of clean grain per acre is estimated at 1,589,400 tons this year as against 1,838,400 tons reported in the corresponding forecast of last year.

① R. S. FINLOW,
Director of Agriculture, Bengal (offg.).

DACCA,

The 2nd December 1922.

APPENDIX I.

Final Forecast of the *Bhadoi* Crops of Bengal, 1922-23.

District.	Names of crops.	Estimated normal area under each crop.	Estimated area under each crop.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting of each crop was begun this year, and whether that date was early, normal or late.	Remarks by District Officers.

								The decrease in area is due to lack of rain at the time of sowing.
								The weather was not favourable owing to prolonged drought at the beginning. Sudden flood afterwards caused damage to the crops on low lands. The outturn has therefore fallen below the moral.

District.	Names of crops.	Estimated normal area under each crop.	Estimated area under each crop.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting of each crop was begun this year, and whether that date was early, normal or late.	Remarks by District Officers.
			Last year.	This year.	Last year.	This year.		
Mymensingh.	<i>Bhadoi</i> paddy (autumn rice).	390,600	745,000	717,200	85	85	The decrease in area is due to want of timely rain. The weather was not generally favourable. The outturn is below the normal owing to damage caused by drought at the beginning.
	Other <i>bhadoi</i> pulses ...	100	100	100	80	80		
	<i>Bhadoi</i> fruits and vegetables, including root-crops.	5,500	14,000	14,800	60	75		
	Other <i>bhadoi</i> food-crops	43,900	43,900	43,900	72	72

DEPARTMENT OF AGRICULTURE, BENGAL.

Third Forecast of the Cotton Crops of Bengal, 1922-23.

[NOTE.—On an average of the five years ending 1920-21, the area under the cotton crops in Bengal has represented some 0.2 per cent. of the total area under cotton in India.]

THERE are two crops—early and late. The "early" crop is chiefly grown in the Chittagong Hill Tracts and in the Tripura State and to a small extent in other districts. The "late" crop is grown in Bankura and Midnapore.

Character of the season.—The early crop suffered in its early stages through prolonged drought, but since then favourable weather has somewhat improved the prospects. A fair outturn is anticipated.

The late crop is thriving well on the whole.

Area sown.—The total area sown with the early crop is returned at 70,186 acres and that with the late crop 1,500 acres, against 64,166 acres and 1,013 acres (now revised), respectively, in the corresponding forecast of last year.

Outturn.—The estimated outturn of the early crop is returned at 18,018 bales this year against 14,250 bales in the corresponding forecast of last year. The outturn of the late crop is estimated at 537 bales this year against 451 bales (now revised) in the corresponding forecast of last year.

R. S. FINLOW,
Director of Agriculture, Bengal (offg.).

DACCA, the 7th December 1922.

(a) For Murshidabad, Birbhum, Hooghly, Rajshahi, Raungpur, Bogra, Mailda and Noakhali.

(b) For Nadia, Murshidabad, Jessore, Birbhum, Hooghly, Rajshahi, Mailda, Tippera and Noakhali.

† Revised.

(1) The weather was favourable to the growth of the crop. The harvesting of the early crop is normal.

(2) The weather and general condition of the crops were not good.

(3) The weather and general condition of the crop have been fair. The date of harvesting is normal.

(4) Continuous drought after sowing hampered the growth of the plants. Since then the effects of the weather were favourable. The date of harvesting is normal.

(5) Want of rain at sowing time affected the condition of the plants. But subsequent weather being somewhat favourable, the condition of the crop is now fair. The date of harvesting is a little late.

(6) The weather has not been favourable. The condition of the crop is fair and the date of harvesting is normal.

J. GHOSH,
for Director of Agriculture

DISTRICT REPORTS ON WEATHER AND CROPS

For the week ending on the 6th December 1922.

Summary.—There was no rainfall throughout the Presidency excepting some scattered showers in parts of Darjeeling. Prospects of standing crops are generally good. Harvesting of winter paddy continues briskly. Sowings of spring crops are nearly finished. The outturn of early cotton is expected to be fair. The average price of common rice for the province has fallen by about 1·9 per cent. as compared with that of the previous week.

Serial No.	District and subdivision.	Rainfall.	PRICE OF COMMON RICE, IN SEERS, PER RUPEE.		Character of the weather, condition of crops, etc.
			This week.	Previous week.

LIBERALITY OF BABU HARENDRAY KUMAR RAY CHOUDHURY, BALIATI.

No. 2521 Edn., dated Calcutta, the 9th December 1922.

From—S. W. GOODE, Esq., I.C.S., Secretary to the Government of Bengal, Education Department (offg.).

To—The Commissioner of the Dacca Division.

Minister in charge : The Hon'ble Mr. P. C. Mitter, C.I.E.,

WITH reference to your letter No. 6990J., dated the 25th October 1922, I am directed to request that you will be so good as to convey the thanks of Government (Ministry of Education) to Babu Harendra Kumar Ray Choudhury of Baliati, in the district of Dacca, for his liberality and public spirit in making a donation of Rs. 15,000 for the construction of a pucca building for the Baliati Iswar Chandra H. E. School.

DEPARTMENT OF AGRICULTURE, BENGAL.

Second Forecast of the Winter Rice Crop of Bengal, 1922-23.

[NOTE.—On an average of the five years ending 1910-21, the area under Winter Rice in Bengal has represented some 19·7 per cent. of the total area under rice in British India.]

Character of the Season.—The ante-monsoon season was marked this year by the prevalence of a prolonged drought, which extended during the period November 1921 to the end of May 1922. The preparatory tillage was seriously hampered in consequence and sowings of broadcast paddy, which commenced slowly during the early part of the season, finished as late as June. The setting in of the monsoon early in June greatly revived the prospects of the broadcast variety and facilitated the transplanting operations. The rainfall in the months of July and August was unevenly distributed, with the result that floods caused some damage to the lowland crop in parts of West Bengal. The highland crop, on the other hand, fared well. Transplantation continued later than usual, till the third week of September. Towards the end of September and in the early part of October rainfall was abnormally heavy, especially in parts of North Bengal and Faridpur, causing flood and considerable damage in a number of districts, of which Faridpur, Rajshahi, Bogra, Pabna, Nadia and Jessore were the worst sufferers. In the subsequent dry weather the crop in these tracts recovered somewhat. Scattered showers in November have helped the flowering of late-sown paddy. On the whole a satisfactory crop for the broadcast variety and a good one for the transplanted variety is expected for the province.

Acreage.—According to the District Officers' estimates, the total area under winter rice amounts to 16,171,600 acres as against 15,602,800 and 15,850,200 acres, respectively, in the corresponding and final forecasts of last year.

Outturn.—From the district return appended it will be seen that Burdwan, Bankura and Midnapore report a bumper crop (*i.e.*, 133.117 and 116 per cent., respectively). The districts of Birbhum, Hooghly, Darjeeling, Rangpur, Bakarganj and the districts of the Chittagong Division report a normal crop, nine districts a crop between 92 and 83 per cent., and the rest between 79 to 58 per cent.

Accepting 92 per cent. as the provincial outturn worked out on the District Officers' estimates the gross yield of cleaned grain from the winter rice crop, on the basis of a normal yield of 12½ maunds per acre, amounts to 6,831,700 tons this year as against 6,806,300 and 7,278,200 tons, respectively, in the corresponding and final forecasts of last year.

R. S. FINLOW,
Director of Agriculture, Bengal (offg.).

DACCA, the 12th December 1922.

APPENDIX I.

Second Forecast of the Winter Rice Crop of Bengal, 1922-23.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
		Last year (1921-22).	This year (1922-23).	Last year.	This year.		
24-Parganas ...	1,041,500	726,100	713,800	92	83	November. Normal	The effects of weather on cultivation and growth of the crop have not been favourable in the subdivisions of Barasat and Diamond Harbour. Damage has been caused to the crop by floods and insect pests in Barasat and Diamond Harbour, and the outturn accordingly is expected to fall below the normal.
Nadia ...	136,800	213,400	211,700	58	58	Not yet commenced	The weather has been favourable. Some damage was done to the crops by the late floods in the lowlands, and the outturn is therefore expected to fall below the normal.
Murshidabad ...	51,400	298,000	321,400	75	92	Ditto	The weather has been favourable. The increase in area as compared with the estimate in the first forecast is due to good rainfall and the subsequent transplantation. The outturn is expected to fall below normal by about one anna owing to the damage done to the crop by drought in the flowering season.
Jessore ...	568,100	463,900	485,000	83	67	Middle of November. Normal	The weather has not been favourable. About 50 per cent. of the crop was damaged by flood and heavy rain in some parts of the district.
Khulna ...	526,200	731,100	779,000	92	92	Ditto	The weather has been favourable. The outturn is expected to fall below the normal owing to some damage done to the crop by rather excessive rain in the early part of October.
Burdwan ...	874,800	665,700	712,800	75	133	End of November. Normal	The weather conditions were almost ideal, and such a good crop has seldom been seen in the district. A bumper crop is expected in spite of the slight damage to the crop in a limited area owing to floods from the Chachramara river.
Birbhum ...	604,700	525,800	526,000	59	100	December. Normal	The weather has been favourable.
Bankura ...	644,000	644,000	640,000	67	117	Not yet commenced	The effects of weather have been good. A bumper crop is expected, though some damage was caused by floods and insects in places.
Midnapore ...	1,637,100	1,398,500	1,484,000	108	116	Ditto	The condition and effects of weather on the growth of the crop have been good. Heavy rain and floods have done some damage to the crop in certain parts of the district. The outturn is however expected to be above the normal if no untoward circumstances happen.
Hooghly ...	276,700	197,300	204,500	67	100	Ditto	The weather has been favourable. A normal outturn is anticipated.
Howrah ...	117,000	123,400	97,400	100	79	Ditto	Effects of weather have not been favourable on the cultivation and growth of the crop in areas affected by floods. Owing to damage caused by floods in the Panchla, Jagatballavpur, Uluberia, Amta and Singti the outturn is expected to fall below the normal.
Rajshahi ...	822,700	676,700	735,600	92	58	End of November. Normal	Severe floods at the end of September destroyed a large area under rice, especially in the subdivisions of Natore and Naogaon. In parts unaffected by flood the season has been favourable. The low outturn as compared with the first forecast is due to effects of floods.
Dinajpur ...	1,120,300	929,000	972,700	100	83	Not yet commenced	The crop on the low lands in the Balurghat subdivision has been damaged to a great extent. Hence, the low outturn.

District.	Estimated normal area under winter rice.	Estimated area under winter rice.		Estimated outturn as a percentage of the normal yield per unit of area.		Date by which the harvesting generally commenced this year and whether that date was early, normal or late.	Remarks by District Officers.
		Last year (1921-22).	This year (1922-23).	Last year.	This year.		
Jaiparguri	467,400	392,600	430,500	100	92	Not yet commenced	The increase in area is due to favourable weather. The weather was on the whole favourable, but in some parts of the district the rainfall was a little insufficient affecting the growth of the crop.
Darjeeling	50,900	25,600	25,800	117	100	November. Normal	A favourable outturn is anticipated.
Rangpur	822,300	617,900	637,200	125	100	End of November and early in December. Normal.	Since the issue of the first forecast the weather has been favourable and its effects on the growth of the crop are good. Some damage was caused to the crop in a small portion of land in the Gaibandha subdivision bordering on the Bogra district and in the char areas of the Kurigram subdivision by the recent flood.
Bogra	303,000	448,000	450,000	85	70	Not yet commenced	Heavy floods in September last damaged the transplanted paddy partly in the western and southern parts of the district, and the outturn is therefore anticipated to fall much below the normal.
Pabna	566,000	400,000	357,200	83	83	First week of November. Normal.	About 2 annas crop was damaged by drought in the area not affected by floods. The decrease in area as compared with the first forecast is due to subsequent revision.
Malda	326,200	242,700	270,000	70	92	Not yet commenced	The weather proved favourable to the transplanted paddy up to the first week of October. Some damage was caused to late sown broad-cast paddy by floods. The cessation of rain after the first week of October as well as floods affected the transplanted paddy in some parts of the district.
Dacca	647,900	703,900	698,500	90	87	November. Normal	The weather has been fairly favourable. Some damage has been caused to the crop by flood in the middle of June last.
Mymensingh	1,455,500	1,429,000	1,411,500	117	85	Not yet commenced	The weather has been generally favourable. Some damage has been done to the crop.
Faridpur	770,100	761,400	745,200	100	59	End of October. Normal	The weather has not been favourable. Damage caused to the extent of about 25 percent. owing to floods and heavy rain. The outturn is therefore expected to fall far below the normal.
Bakarganj	1,200,000	1,342,000	1,350,000	100	100	End of November	The weather has been favourable. Further transplantation was done since the issue of the first forecast. The increase in the area as compared with the last year is due to some jute, sugarcane and aus lands having been brought under the crop.
Chittagong	418,400	421,800	428,800	100	100	November. Normal	The weather has been seasonable and its effects on the growth of the crop good. Damage was done to the crop by the infusion of saline water in the low-lying area of Cox's Bazar subdivision during the cyclone of April last, but, on the whole, the outturn of the district is anticipated to be good.
Tippera	787,000	796,400	806,400	133	100	Ditto	The weather has been favourable and its effects on the growth of the crop good. The crop was damaged to the extent of about 8 per cent. both in the Sadar and Chandpur subdivisions owing to want of rain during the period of growth in the former and to flood in the latter.
Noakhali	705,000	630,000	630,000	100	100	Early in November	The weather has been favourable for the cultivation and growth of the crop.
Chittagong Hill Tracts	47,500	46,000	46,500	75	100	End of November	The weather has been favourable and its effects on the growth of the crop good.
Total Bengal	17,488,500	15,850,200	16,171,600	100	92		

APPENDIX II.

Abstract statement of the estimated acreage and outturn of the winter rice crop of Bengal, 1922-23.

Province.	AREA (IN ACRES)				YIELD (IN TONS).

Calcutta Improvement Trust.

THE accounts of the Calcutta Improvement Trust for the year 1920-21 having been audited by an auditor appointed by the Local Government, the following abstract of accounts is published in accordance with the provisions of section 136 of Bengal Act V. of 1911.

T. EMERSON, *Chairman.*

CALCUTTA, the 8th December 1922.

CHAIRMAN—

Annual Accounts for the year ended 31st March 1921.

I beg to submit the accounts for the year ended 31st March 1921.

CAPITAL ACCOUNT.

At the time of preparing the budget estimates for the year 1920-21 it was estimated that the deficit on capital account at 31st March 1920 would amount to Rs. 126½ lakhs, but owing to the capital receipts being Rs. 1·42 lakhs in excess of the estimate and the expenditure on land acquisition being Rs. 11·85 lakhs less than was provided for during the three months January to March, the actual deficit was Rs. 113·27 or, approximately, Rs. 13 lakhs better than was anticipated.

RECEIPTS.—The receipts for the year ended 31st March 1921 amounted to Rs. 47 lakhs against an estimate of Rs. 99½ lakhs or Rs. 49½ lakhs excluding the new debenture loan of Rs. 50 lakhs which it was found unnecessary to draw upon during the year. The difference between the actuals and the estimates of Rs. 2½ lakhs is arrived at as follows :—

	1920-21 Budget.			Actuals.			Difference.				
	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.		
Fees under section 78	...	2,00,000	0	0	5,92,700	0	0	+3,92,700	0	0	
Sale of land	...	45,00,000	0	0	37,86,600	0	0	-7,13,400	0	0	
" buildings	...	2,00,000	0	0	2,97,900	0	0	+97,900	0	0	
Premia on leases	...	7,000	0	0	22,400	0	0	+15,400	0	0	
							Nett	...	-2,97,400	0	0

EXPENDITURE.—The total expenditure for the year was Rs. 104½ lakhs or Rs. 74 lakhs less than the budget estimate. The difference between the actuals and the estimates is arrived at as follows :—

	1920-21 Budget.			Actuals.			Difference.				
	Rs.	A.	P.	Rs.	A.	P.	Rs.	A.	P.		
Land acquisition	...	1,48,21,000	0	0	84,79,000	0	0	63,42,000	0	0	
Engineering works	...	21,80,000	0	0	14,73,000	0	0	7,07,000	0	0	
Stores	...	5,60,000	0	0	2,00,000	0	0	3,60,000	0	0	
							Total	...	74,09,000	0	0

The closing deficit on Capital Account which it was estimated would amount to Rs. 205·31 lakhs (including the receipt of Rs. 50 lakhs from the debenture loan) stood at Rs. 170·45 lakhs.

REVENUE ACCOUNT.

RECEIPTS.—The total receipts for the year are Rs. 42,80,000 against a budget estimate of Rs. 32,95,000 or, approximately, Rs. 10 lakhs excess arrived at as follows :—

	Rs.	A.	P.	
Duty on transfer of property	...	4,98,000	0	0
Terminal tax	...	59,000	0	0
Duty on jute	...	1,72,000	0	0
Rents from temporary lettings	...	1,17,000	0	0
Interest	...	1,14,000	0	0
Rent charges	...	10,000	0	0
Total	...	9,70,000	0	0

EXPENDITURE.—The expenditure for the year was Rs. 8,35,000 against a budget estimate of Rs. 8,39,000.

The closing balance on revenue account shows a surplus of Rs. 2,23,78,062-2-10, of which a sum of Rs. 1,70,45,510-15-11 has been spent on capital account to meet payments in excess of capital receipts. The nett balance of Rs. 53,32,551-2-11 was held as follows :—

	Rs.	A. P.
3½ per cent. Government paper, etc.	..	17,67,239 0 0
